

PROFESSIONAL PROFILE

Computer Science Engineer from Andrés Bello University with experience in full-stack web development, Artificial Intelligence, Machine Learning, and Data Science projects. I have designed and implemented production-oriented systems including AI-assisted platforms, REST APIs with JWT authentication, relational databases, and data visualizations. I learn quickly, collaborate effectively, and focus on scalable, results-oriented solutions.

EXPERIENCE

Professional internship · Vibe Coding and AI model research

Remote · Jan 2026 - Mar 2026

Institute of Technology for Innovation in Health and Well-being (ITISB)

- Researched the Vibe Coding methodology, its benefits, limitations, and software development use cases.
- Designed and executed pipelines to compare AI models on programming tasks, evaluating quality, productivity, efficiency, and robustness.
- Documented results and best-practice recommendations for implementation.

Internship · AI-powered academic communication automation

Viña del Mar · Aug 2025 - Dec 2025

Andrés Bello University

- Built n8n workflows to create and distribute academic announcements tailored to LinkedIn, Instagram, and other social platforms.
- Integrated AI to select the appropriate channel and generate content based on each announcement type.
- Implemented database-backed publication history, reducing manual work and improving traceability.

HIGHLIGHTED PROJECTS

MACHINE LEARNING · THESIS

Academic trajectory analysis

Classification models predicting educational macro-areas from longitudinal data, evaluated with F1-score and interpreted using SHAP.

FULL-STACK

Citizen security reporting

End-to-end incident creation, storage, and visualization with Leaflet, OpenStreetMap, and an architecture prepared for FastAPI.

MACHINE LEARNING

CS:GO player performance

Supervised models, K-Means clustering, outlier detection, and analysis using pandas and scikit-learn.

FULL-STACK · GIS · DATA

Public safety territorial intelligence

Leaflet maps and heatmaps, moderated anonymous reports, and Supabase for authentication, PostgreSQL, storage, and Row-Level Security.

[View live project ↗](#)

MACHINE LEARNING

Concrete strength prediction

Regression and neural networks with TensorFlow and Keras, feature selection, model comparison, and hyperparameter optimization.

PORTFOLIO · INTERACTIVE WEB

Professional portfolio

An interactive web experience showcasing my profile, projects, technologies, and professional background.

[Explore portfolio ↗](#)

EDUCATION

Computer Science Engineering

2020 - 2025

Andrés Bello University

Professional degree in Computer Science Engineering, Bachelor of Engineering Science, and Bachelor of Engineering.

CERTIFICATIONS

Foundations of Data Science · Google, 2026

Data Science Professional Certificate · IBM, 2025

Generative AI for Data Science · IBM, 2025

Data Scientist Career Guide · IBM, 2025

GitHub Copilot for Beginners · Coursera, 2025

TECHNICAL SKILLS

Languages Python, TypeScript, JavaScript, Java, C++**Backend** FastAPI, Node.js, Laravel, REST APIs, JWT**AI / ML** scikit-learn, TensorFlow, Keras, SHAP, model evaluation**Frontend** Angular, React, HTML, CSS, SCSS**Data** PostgreSQL, SQL, Pandas, Power BI**Tools** Git, GitHub, Docker, n8n, Jira, Trello
